

Mr. Hamid Naghizadeh(CEO, Member of the board of directors & Shareholder)

Mr. Naghizadeh was born in 1968 in Isfahan, Iran; he received his B.Sc. in Computer Science, majoring in Hardware Engineering from [Isfahan University of Technology](#) in 1992. Mr. Naghizadeh has been active in manufacturing hardware from the time he was a university student. He designed and manufactured a Micro-Computer based on Z80 processor, an EPROM Programmer, and an Emulator EPROM in 1989 and 1990 respectively, because of these achievements he was ranked first in Iranian Informatics Association Competition. He then joined [Isfahan University of Technology Research Center](#) and designed different types of hardware.

He began to design A/D and TMS boards in year 1993, in order to sample current and voltage waveforms of three phases. Considering previous experiences in the area of measuring electrical quantities and existence of encouraging prospects for working in this area, he and four of his colleagues from Isfahan University of Technology established Behinehniru Spadan Company in year 1999. The company has worked extensively in measuring quantities of three phase lines, and its products are designed based on recent technologies currently in use around the world.
